When my baby needs good lovin' do I hesitate?  
No, my love machine is programmed so she never has  
to wait

It's automatic, the love rush in right away, right away  
It's automatic, the love rush in right away

If there's static on the line  
I jes' give her a little more juice  
I really lose my mind  
When she blow my fuse

And when her lips need kissing, do I let her down?  
No, my lips are programmed too, they come right down

It's automatic, the love rush in right away, right away  
It's automatic, the love rush in right away
