All wigged out, I'm a raver and a rover  
I can't help it, I can't help it when she bends over  
You do my thing, I'll do yours  
I can't help it, I can't help it when she opens the door

She drops her number two pencil  
Goes to pick it up, then she bends over  
I can't help it, I can't help it

I was searchin' with a big old search light  
Through the riot of the day and the night  
Sometimes I wonder just what I been through  
And could I come to find someone like you

Under the covers with a little old red radio  
I hear a song about a place I long to go  
On lover's island neath a sky so new and blue  
And could I come to find someone like you

I was stranded in a long lost driveway  
When a smile came floating through the gate  
Then I saw you, you were out in the day light too  
And now I come to love someone like you
