I can't believe that I'm not dead!
It sucked the brain right outta my head
I know I'm not the fuckin smartest around
But I saw a meteor crash near my town
People are disappearing without a trace
All I know is that it came from outer space
It was the creature that ate my brain
The Creature's got tentacles N' green slimy skin
We don't know what kinda mess that we're in
He's gonna get you and suck out yer brains
That is if at first you don't go insane
It was the creature that ate my brain
I can't believe that I'm not dead
It sucked the brain right outta my head
My best friend Johnny tried to get outta town
But some military guys took him down
They got the place surrounded with guns and with tape
Now all I do is just plan my escape
>From the creature that ate my brain
I can't believe that I'm not dead
It sucked the brain right outta my head
