What do u do, what do u say
When the time cant be replaced
Moments are real
Wish I was still living yesterday

Where do I go, what do I do
When everything has changed
Know that it's real, way that I feel
I'll carry this love with me always

Came home from where I've been
But will it ever be again
Every time I remannince
My heart is filled with joy

If only I could paint my face
I would color me in to stay
Sometimes life brings
You no choice

What do u do, what do u say
When the time cant be replaced
Moments are real
Wish I was still living yesterday

Where do I go, what do I do
When everything has changed
Know that it's real, way that I feel
I'll carry this love with me always

Don't know what's best for me
But I know my heart will never leave
'Cause under neath this
Sky I'll always have a place to call home

Something 'bout this love I found
It makes me see the world differently
What can measure the ways
That I've grown

What do u do, what do u say
When the time cant be replaced

Moments are real
Wish I was still living yesterday

Where do I go, what do I do
When everything has changed
Know that it's real, way that I feel
I'll carry this love with me always

I've become so much more
A person that I've never thought I could be
First time that I found
A true heart of me

What do u do, what do u say
When the time cant be replaced
Moments are real
Wish I was still living yesterday

Where do I go, what do I do
When everything has changed
Know that it's real, way that I feel
I'll carry this love with me always

What do u do, what do u say
When the time cant be replaced
Moments are real
Wish I was still living yesterday

Where do I go, what do I do
When everything has changed
Know that it's real, way that I feel
I'll carry this love with me always

What do u do, what do u say
When the time cant be replaced
Moments are real
Wish I was still living yesterday

Where do I go, what do I do
When everything has changed
Know that it's real, way that I feel
I'll carry this love with me always
