Please please please don't let us down
It's your turn to take it in the mouth
I can see it
You're not angry
What's the difference?
It's all been done
I'll never sound like him
I'll never sound like him

So soon for me
No, I can't believe it more than you

Another photograph for me
It's what I need to get me by today
I once was lost but now it's found
So I figure my head's once touched the ground
So nicely blind, so nicely blind for me

So soon for me
No, I can't believe it more than you
