Get, get away (4x)
Throw your issues in my face
Anticipate the words I say
Forget about it
I got this figured out
Take a look in her eyes
So beautiful so full of lies
Hate me like you say you love me
I just need a reason to run (Get, get away) (3x)
Away from you cause your my bad habit
Why cant I break away
And I could see it coming
Cant fight it anymore
You had your mind made up
When you (when you) walked right through that door
Take a stab in the dark
Throw a round a thousand names
Start screaming at me saying I was to blame
I hope your happy now
Happy by yourself
Run!
I just need a reason to run (Get, get away) (3x)
Away from you cause your my bad habit
I got you choking on your words
Cause you've said too much
I'm returning all our love straight back to you
Get, get away
Get, get away
Run!
I just need a reason to run
I just need a reason to run, away from you
Cause your my bad habit
Get, get away
Get, get away
Run!
I just need a reason to run (get, get away)
I just need a reason to run, away from you
Cause your my bad habit
