Start with the basics
Tell me its alright
Tell me I'm alright
So you want to know
So you got to know
Everything that takes the best of me
So lets entertain the thought
I cant take this no more
I cant take this no more
So lets entertain the thought
This could be over
Face the day, Face to face
Cause we've come too far to throw it all away
This is the art of letting go
This atmosphere is cold
And its all my own
Its all I see
Cause I'm living the words scratched into my skin
So dont look now cause its now or never
Dont look now
This could be over
Face the day, Face to face
Cause we've come too far to throw it all away
This is the art of letting go
Face the day, Face to face
Cause we've come too far to throw it all away
This could be over (x3)
It comes down so hard on me (x3)
Face the day, Face to face
Cause we've come too far to throw it all away
This is the art of letting go
Face the day, Face to face
Cause we've come too far to throw it all away
This is the art of letting go
Face the day (x3)
