Light the fuse, whats to lose?
Our hopes and fears we'll have to choose
Move your feet! Where's the beat?
Let's dance until our blood runs dry
Explode this energy we've all consumed
Let's get pumped on the time we share
Here it is right now - 3,2,1!

Set It Off!

Moves your feet and where's the beat?
We're going around in a circle
My head is going to overload

Set It Off!

Where the fuck's the energy?
Beaten down black and blue
These weights are falling down on me

Set It Off!

This place is set to detonate!
