# "A Little Bit Of Everything"

Visit "[A Little Bit Of Everything](#)" on [MotoLyrics.com](https://MotoLyrics.com)

How did it happen it was never really clear  
I never thought that you and I would still be here  
So many nights of love and many more to come  
When we would sing together till the song was sung

I don't know when it was my heart began to fly  
I don't remember when the music made me cry  
We only did what was so natural to do  
And all the things you said to me I want to give to you

You said you wanted - A little bit of everything  
You said you wanted - A little bit of everything  
You know you wanted - A little bit of everything  
And we both wanted - A little bit of everything

When all the world was listening to the radio  
We had to close our eyes and turn the lights down low  
And when that song would play we stared into the light  
And when I held you close we fell into the night

Each little note would leave a trail across my heart  
And every tear would be a candle in the dark  
I don't know how it all began so long ago  
It's not for us to understand its only love that needs to  
know

[Repeat Chorus]

Like a fleeting dream, when we meet it seems  
We are caught in between, and there's only tonight  
And this moment feels so right

[Repeat Chorus]
