Hold on to your love be strong when it gets rough  
Hold on when it breaks cos everyone can make  
mistakes  
There's always tomorrow when the light starts to fade  
There's still your heart to follow  
Though it may be torn and the edges are frayed

Don't wait for yesterday, it's gone so far away  
Didn't know the words to say, I only know I want you  
now

Hold on if you can and don't try to understand  
There will be another day when you'll see a different  
way  
There's always tomorrow when the light starts to fade  
There's still your heart to follow though  
it may be torn and the edges are frayed

Don't wait for yesterday it's gone so far away  
I didn't know the words to say, I only know want you  
now  
Don't long for yesterday that dream has flown away  
If it's not too late to say I only know I need you now

Let the flame subside let the worlds collide  
All that matters now is how you really feel, how you  
really feel
