

Air Supply "We The People"

Visit "[We The People](#)" on MotoLyrics.com

All the people in the world
Distant voices to be heard
Sacred rhythm shall make you free
Dance together, unity
From creation, the mask of God
Inspiration is all we've got
Hidden knowledge, can't get enough,
Taking chances, making love
Face to face with the moment of truth,
All those little white lies
We the people, we the people decide
We the people, shedding skin
Age of reason lies within
Explanation, the club of Rome
Meditation, and staying home
Moving forward, the chosen few
Teach your children what is new
Band the table, beat the drum
New messiah, overcome
Face to face with the moment of truth,
All those little white lies
We the people, we the people decide
We the people, we the people decide
All the people in the world
Distant voices to be heard
Sacred rhythm shall make you free
Dance together, unity
Face to face with the moment of truth,
All those little white lies
We the people, we the people decide
We the people, we the people decide
Face to face with the moment of truth,
All those little white lies
We the people, we the people decide
We the people, we the people decide
We the people, we the people decide
We the people, we the people decide
