Everything I ever wanted is going away
And all I ever needed from you was for you to stay
So take this,
Because I know you'll never break this
So just leave it all behind

Selfish and overrated like the times that you told me,
That I was crazy

If you say you want me, then please fucking show me,
Cause actions speak louder than words'.
So take this,
Because I know you'll never break this,
Cause I'll just leave it all behind

Selfish and overrated like the times that you told me,
That I was crazy,
Your Stupid but still jealous of the fact that I don't want
you

I'm stuck right here, inside a world that doesn't have a
chance to carry on,
The past, is over can we live our lives, without regret
The past, is over can't we live our lives without regret
