(Damon Black)

I just overheard him calling you an angel  
And I guess he's found his heaven's touch you bring  
But just wait until he tries to find the way of holding  
heaven  
When his angel's leaving out on scarlet wings.

Cause another has to say to scarlet wings just fly away  
Been gone will be the song his angel sings  
And there's no returning flight just cold and lonely  
nights  
While his angel's leaving out on scarlet wings.

--- Instrumental ---

But he just stood in disbelief and call it envy  
When I try to tell him what that all told me  
Now let him join the rains of those call blues that never  
listen  
While his angel's leaving out on scarlet wings.

'Cause another has to say to scarlet wings just fly  
away...  
Been gone will be the song his angel sings  
And there's no returning flight just cold and lonely  
nights  
While his angel's leaving out on scarlet wings.

While his angel's leaving out on scarlet wings...
