

## **The Subtle Way "No Use For Needles"**

Visit "[No Use For Needles](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Here comes the anesthesia  
Its coming straight from your hips  
Weve got no use for needles  
Weve got this all under our belt  
Sirens fill the air waves  
Warning lights scale the sea  
Doctor make the incision  
I dont know how much longer I can wait

The journey from left to right has never been so far  
Straight lines never lied to me before  
Has time become a matter of machines that lie as well?  
Or is definition something out of reach?

Their shotguns came with their own bullet holes

Here comes the euthanasia  
They may have given up on me  
Here comes the euthanasia  
It seems theyve given up on me  
This time we need a needle, quick and easy  
How sad when the shotgun keeps the beat for my heart

Fear is no sin sweetheart  
They only like the way it tastes

Composed of words that never should have made it  
past the suffix  
Lethargic at the root
