Come alive
Now I can see
You've got the vibe
And your shiver's gone

They come alive
Like the sun comes and goes
They come alive
They come alive

Where you come from is all they're used to me? (x5)

Beaneath the ground
The beauty's free
Their flows the sound
Like the sun comes and goes
It goes around
It goes around

Where you come from is all they're used to me? (x5)

MILK!

Where you come from is all they're used to me? (to
fade)
