There you go, you're starting trouble  
again

Get an education

If there is a god - he's on vacation.

What do we gotta do to get it in your head?

We're only trying to help you.

We know what you're going through.

You can see a change is highly needed.

There's no need to feel defeated,

The past is dead and gone.

We're all hoping for a transformation,

Never mind the desperation

There's plenty of time for that

Watch Out! We will,

(In a closed system)

[If you begin to question]

Change the future.

(In a closed system)

[the significance of mankind]

Evolution,

(of children's futures)

[you'll only get discouraged]

Mother Nature

(and lover's values)

[so think about the good times]

Humans fixing

(Don't be pretentious)

[Our hope is in the future]

Human problems.

(Just optimistic.)

[The answer is within ourselves.]

We know history can be a little absurd,

All of the crusaders

"Killing-in-the-name-of-Jesus masqueraders"

The future is an alibi

It's time to put our arms down

It's time to lift our heads up high.

You can see a change is highly needed

There's no need to feel defeated  
The past is dead and gone  
We're all hoping for a transformation  
Nevermind the affectations  
There's plenty of time for that

Congratulations! The past is dead and gone.  
We've finally succeeded  
A little R&R was all the planet needed  
Or maybe just the Western world  
Or maybe it was just me...  
But the point is that I feel relieved.

Maybe if you tried to understand the creature,  
You'd be less like Hitler and more like a teacher  
...and you'd be something in their eyes  
How can we suppose to comprehend our fate  
And still see a need to procreate?  
How can we wallow in our pride?  
..."and who are you?"
