

The Take-Off

"It Will Follow The Rain"

Visit "[It Will Follow The Rain](http://MotoLyrics.com)" on MotoLyrics.com

Have you ever seen the far sight
Of a mountain swallow the sky
As you travel trough the valley
As you?re speeding
Still far behind
Through the valley where lovers climb

Have you ever seen the locust
Clean his wings right
After a plague
Like you?re sending
Up a dark cloud
To dim the sunlight
To end the day
To kill the sunlight
To end the day

Yes it will follow the rain

Have you ever seen the quiet
Indecision of a man
When he?s standing
By the fire
With an eager
Friend in his hand
Will he ever quiet understand

That it will follow the rain
I said ooh my friend
It will follow the rain

Have you ever seen your baby
Getting caught by
The lonesome wind
And the whistling
Round the corners
Telling you they
Have let her in
Separation can now begin

Yes it will follow the rain

I said ooh my friend
It will follow the rain
i said ooh my friend
it will follow the rain

Have you ever seen the far sight
Of a mountain swallow the sky
As you travel through the valley
As you're speedin' still far behind
Through the valley where lovers climb

Where the children still blink and sigh
They have caught a lightning strike
And it charge
Us to watch it die
In the valley where lovers climb

Yes it will follow the rain
I said ooh my friend
It will folloooww the rain
