Find a new way to hide  
The day is night and has said it's goodbyes  
Fear the man made of wolf

Oh shit oh no  
You'll find us, You'll find us,  
In the thickness  
Of the woods

This is not the end  
We'll fight for our revenge  
A darkened night reflects on our regrets  
Their insides are empty  
A man made of wolf, or a wolf made of man  
This is their legend of existence,  
A missing life on edge  
Now, now the cross you turn  
Bite to break the skin  
Now, now the cross you turn  
A man made of wolf, or a wolf made of man  
Becomes your nightmare undisguised  
Forsaken, we will never forget what's ours

This is not the end  
We'll fight for our revenge  
It takes a little to fail we're finding out,  
We're finding out,  
We're finding.
