If we could all see the forest on our own someone  
would get lost  
Walking through the trees a world's stage of endless  
sold out shows  
Full of clowns and losers nobodies so why should I try  
to fix  
It if it's broken but still works fine the only way I'd notice  
any  
Difference here at all is if the world stopped rotating on  
a  
Dime I missed the best beginning to an end when I got  
Caught up thinking 'bout a start splintered dreams I  
tried my  
Best to mend the more I mend the more they fall apart.
