The ancient calendar,
I-net software and the I-ching oracle
Speak of the end of this day.
And our history shows
The track record of the prophecy.
Here now are all of the signs so say it that way
With war, corruption, H1N1 has already begun
This has begun.
We are a trained culture to look for the end
The book speaks the words,
And this is the end that we intend.
So she fell into trance,
And the cities burned at only her first glance
And then she said,
"You will see the beast roar,
And when the time runs to the end,
You will hear the winds of war."
