f you break that's all you can do
My mistake was I thought more of you
If you find yourself beside me looking for some faith
I can't say that our world is safe
When I'm on my way to another lonely place

Lasting heartache is now in view
A cold dark shade that once was you
If you find yourself beside me looking for some faith
I can't say that our world is safe
When I'm on my way to another lonely place
I can't say that our world is safe
When I'm on my way I'm sad to leave this
Pale eyes on a sullen face
Frail ties and time misplaced
time misplaced

So if you break that's all you can do
My mistake was I thought I knew you but
Colours bleed through, Colours bleed through
And you who I thought that I knew
Colours bleed through
I can't say that our world is safe
When I'm on my way to another lonely place
I can't say that our world is safe
When I'm on my way with the will to leave this place
yeah yeah yeah yeah
Colours bleed through
Colours bleed through
