How can I know that a woman spells danger
How can I know that a stranger's getting stranger
Pretend and ignore it for my own satisfaction
But sooner or later I'll just sigh & explode - sigh &
explode

How can I say when the voice starts expanding
What can I see now my eyes are getting dimmer
The reason I never took control of these reactions
Cos sooner or later I'll just sigh & explode - sigh &
explode

How do I know if it nerves that are just like
How do I know when to end the silly chit chat
Maybe it's because I demand some attention
But sooner or later I'll just sigh & explode - sigh &
explode

Could it be me that got myself in this condition
What can I do to stop all these hallucinations
Maybe it's because of a stupid superstition
But sooner or later I'll just sigh & explode - sigh &
explode

My head's going round and round
I'm getting very dizzy can't keep up with this noise
My feet swept off the ground better pick myself up
before I drown
My head's going round and round better pick myself up

Sigh & explode
