Verse

I'm sitting in this van with a guitar in my hand
Thinking about my future wondering what's my master
plan
With tomorrow on it's way and no hope for a better day
I'm moving On

Chorus x4

I'm moving on

Verse

Now the nights are so long but the seasons almost
gone
Another year is passing still living the same ol' song
With my eyes on the prize I won't listen to your fucking
lies
I'm moving on

Standing by the road side trying to get to the other side
To turn my life around get my feet back on the ground
Before I loose my will to survive and the bottle buries
me alive
I'm moving on

So baby If you want you know you can come along
Cause living without you can only do me wrong
Just don't get in my way I'll send you back the way you
came and I'll move on
I'm moving on
