#### Verse

Visions of peace visions of truth  
Warping our young minds warping todays coming  
youth  
Leading us to nowhere leading us to trouble times  
Leading us to victory by taking innocent lives  
We bled for our country we bled for the times  
We bled for our people we bled for your lies  
So now it's time to make a stand stand up and fight  
Face the adversity and we'll try and make it right

#### Chorus

Well I'm dreaming yes I'm dreaming of better days  
Hoping these hardships won't stay they'll go away  
And I'm feeling so down with all this hatred going  
round  
You know I'm tired, Lord knows I'm tired

#### Post Chorus

These words not yet spoken have left this world broken  
In time you'll see your bigotry will leave you breathless  
and choking

#### 2nd Verse

Were in a communist country in a supposed democracy  
Leaving it to one man who's stealing all the glory  
So give the people a chance let us all make a stance  
We only got one world so let's give it a chance  
No need for this war no need for this killing  
No need for these battles it's only graves that your  
filling  
All we want is our freedom we don't need your fucking  
greed  
As long as our killing I shall bite the hand that feeds
