1st Verse

Who will answer the call if there's no one there at all
To save these poor living souls who were stranded by
death and cold
There bodies were soaked with blood and sweat trying
to save their land
And all they could get was a blind sided look from
there governments leading man

1st Chorus

So when your future's left in a politician's hand
Expect only greed it's coming plain to see
What this world is coming to

2nd Verse

The innocent is laying face down in the ground
And the smell of death takes away your breath and it's
lurking all around
For many a man this is a day which they'll never forget
As long as blood runs through there veins they'll haunt
you with regret

2nd Chorus

So keep your distance don't ever come around
Because of you my son is buried in the cold dark
ground
And he'll never see the light of day... no more

3rd Verse

One too many times have we all been pushed aside
Let our sorrows wash away with the tide
One too many times have we suffered the gun
Nowhere to hide and nowhere left to run
