What if all my enemies were dead  
and i could forget everything they said  
could I be then who I really am?  
What if I sold everything I own  
And ran away from everyone I know  
could I make another place my home?  
And if I let go all of my ghosts  
who would I dump over the months?  
What if everyone is right?  
Should've taken their advice  
But I can't change my mind  
And if I let go all of my ghosts  
who would I dump over the months?  
(What if everybody else is right?  
should've taken more of their advice)
