"I Know"

Visit "[I Know](#)" on MotoLyrics.com

I know..
Something about you, it's a secret..
Something about you and it's keeping... us
underground
And it's keeping our hands folded, folded

I know...
Something went wrong, it's nothing...
Something went wrong and it's holding... it's holding
our tongues
It's a sterilization

I know...
Something about you yeah
I know...
Something about you yeah
I know...
Something about you yeah...

I know..
Something about you, it's a secret..
Something about you and it's keeping... us in the crowd
And it's keeping our mouths open, open

I know...
Something seems wrong, so I'm guessing...
Something went wrong and it's creepin... into our heads
It's a mobilization

I know...
Something about you yeah
I know...
Something about you yeah
I know...
Something about you yeah...

I know...
Something about you yeah
I know...
Something about you yeah
I know...

Something about you yeah...

(instrumental)

When the sky fills up with secrets...
And the ground opens up and it swallows you whole...

When the sky fills up with secrets,
And the ground opens up and it swallows you,

When the sky fills up with secrets,
And the ground opens up and it swallows you whole...

(instrumental)

When the sky fills up with secrets...
And the ground opens up and it swallows you whole...

When the sky fills up with secrets,
And the ground opens up and it swallows you,

When the sky fills up with secrets,
And the ground opens up and it swallows you whole

I know...
Something about you yeah
I know...
Something about you yeah
I know...
Something about you yeah...

I know...
Something about you yeah
I know...
Something about you yeah
I know...
Something about you yeah...
I know, fuck you!
