What the am I supposed to do  
With this world that I created  
Today your loss becomes my gain  
My selfcontrol and I have disbanded

My finger on the trigger  
I'll take my life  
And paint the walls with my blood  
I'll end all misery  
Let go of all human feeling

The light I used to see  
The since long lost joy

Say my name  
And you will find  
There's nothing to blame  
Live with me in this lie  
And take the pain away

1000 needles through my head  
This pain controlling me  
Is causing me to bleed  
In the old days one would find  
Can't see the road much longer

This downward spiral  
Neverending twisting  
Into hell I march  
Forsaken by the gods  
I let go of all human feeling
