My lifestyle is based on me and how I live it but living in a atomic flush wasteland is the worst thing that could happen and once you take a stand against your enemy you gotta show them who's boss and the most important thing about this is we are fighting for what's right, passion might be something you have in your heart trust me it is but someway or another your friends might hurt your feelings real bad. Instant sensation, claim my instant sensation, these instant sensations are crazy, I gotta make my instant sensation, get yo instant sensation right, them instant sensations got flashylights, instant sensation. And if you feel like crying just blow those tears away and don't ever try begging for your friend's forgiveness again because they will always do the same thing to you and I been down this road before, but this feeling will never ever go away it just won't and all my life I try to make friends but over and over again it never happens and I got several reasons why, this will never be because issue problems or arguements always end friendships or relationships badly and nobody deserve this feeling like I do. Instant sensation, claim my instant sensation, these instant sensations are crazy, gotta make my instant sensation, get yo instant sensation right, them instant sensations got flashylights, instant sensation.
