{pyro!!}{pyro!!}

Aaaaaaahhh...

Out of the misery {(hup, hup, hup, hup!)} to wash my soul

Out of the ground with a new eight count I never came to Rock 'n' Roll

Check in the mirror, and I don't mind

Same old cracks in the face and glass a-just a little more defined

Saw the mike in the distance, avoiding the business
And me? in time - let it shine, let it shine

CHORUS:

Well...

I wanna go where the people go, yeah (x4)

Take me there, anywhere, just so long as there's an atmosphere we'll be round, round, round

Come on down, we all went down...

Show me a hero of head and heart

Rid of the stars and the blah-blah-blahs would be a worthy way to start

Greater the cliches that go round and around

I wanna be where the (cunts/****s) like me are buried six feet underground

If pride is a memory, is nobody angry?

And me? in time - let it shine, let it shine

CHORUS

Well...

(well (x6))

CHORUS

We went down (x3)

We all went down, we went down

We all went down, hey!
