"Baby I Love You"

Visit "[Baby I Love You](#)" on MotoLyrics.com

Well you know I said I'd love you for all time.
Well sometimes I just can't believe you're mine.
But every now and then
I'm ready to say when
Oh, baby I love you, just leave me the **** alone.

Well in your arms is where I'll always stay
But something deep inside says not today
Well i'll be sitting here
working on this beer
Oh baby I love you, just leave me the **** alone.

I try so hard each day
To make things go away
There's nothing left to say for tonight

For a couple of days I won't be comming round
I'm going to go get lost, I think I might skip town
Now I don't mean to pout
But you plain wore me out
Oh baby I love you, just leave me the **** alone.

Oh, baby I love you, just leave me the **** alone
I tried dancing, I just want to go home
I know your cooking's great
But dinner will have to wait
Oh, baby I love you, just leave me the **** alone

Well I'm in a frazzled state
The party will have to wait
Oh, baby I love you, just leave me the **** alone.
