Get your groove on  
If you can

Here's my story and in the end  
I think you're gonna find yourself listening  
Twenty blind years livin' down in a hole  
Feeling my life spinning out of control  
Spun it down, came unwound  
Gave it all up when thruth came around  
Lost and found, laid it down  
On the upside I'm on the rebound

I wanna see you find a better life  
Wanna see you in the big sky  
Wanna see you in the next life  
Wanna find you on the other side

There's only one way to get you there  
'cause life's too short and death's not fair  
There's only one way to get you  
Lay your life down, get it back again

I try and try to get it through to you  
I try and try to get it through to you  
I try and try to get it through to you  
But it's all up to you

Remember this song  
Remember it well  
This is the only way you'll live to tell
