Flying V

If you're standing underneath it, you will see when you
inspect it

That a flying V is made of flying geese

The pointed end flies in the lead
So when it flies, it's hard to read
You've got to tip your head to see
Flying V, flying V

It's a V
In the window of a music store or on stage at a rock
show
Now a flying V is made of a guitar

The pointed end flies in the lead
So when it flies, it's hard to read
You have to be upside-down to see it
