"I Can Hear You"
By They Might Be Giants
Made at the Edison Laboratory
I can hear you
Just barely hear you
I can just barely hear you
This is a warning,
Step away from the car
This car is protected by Viper
Guess where I am
I'm calling from the plane

I'll call you when I get there
You won't hear a buzz
But I'm buzzing you in
I'm buzzing you in
What's your order?
I can super-size that
Please bring your car around
I can hear you
Just barely hear you
I can just barely hear you
