

They Might Be Giants "We Love All The People"

Visit "[We Love All The People](#)" on MotoLyrics.com

We love all the people
And we love to rock the house
No one knows we're coming
So no one's coming out

To this particular rock club
Have we played this club before?
Y'see I can't remember
If we've played this club before

Put your hands together

Get on your knees and pray
Next time we come around here
We won't be back this way

Or to this particular rock club
Is that really the p.a.
Or just somebody's radio
Left in the corner of the room?
