One night with you  
Makes me feel high  
One night with you  
So satisfied So satisfied  
The higher you fly  
The harder you fall  
The blue hour comes  
Not satisfied» ¿ not satisfied  
Spirits outside I forget myself  
Can you give me something can you give me some help?  
I tried everything I tried it all  
Does it make it better with your dust in my heart  
A friend of mine said to protect myself  
Canı» ¿ you give me something can you give me some help?  
Spirits outside I forget myself  
Can you give me something that can turn me around?  
We shot the moon  
Whose shooting who  
The blue hour comes  
Not satisfied not satisfied  
The blue hour stays  
Tell me the truth tell me the truth  
Spirits outside I forget myself  
Can you give meı» ¿ something can you give me some help?  
I tried everything I tried the world  
Does it make it better with your dust in my heart?  
A friend of mine said to protect myself  
Canı» ¿ you give me something can you give me some help?  
Spirits outside I forget myself  
Can you give me something that can turn me around?  
One night
