I Need You (D'Ardis)

Every time I see you
When you're out with someone new
You really break my heart in pieces
With the things you do, yeah
Every time I see you
You're out with someone new
But I love you, you, you
I love you
When I'm six foot underground
My heart it can be found inside of you, you, you
You tell me that you love me
But you always treat me bad
Why you want to make me sad
Treat me bad
You tell me that you love me

But you always treat me bad
Why you want to make me sad
Treat me bad
You say you really love me
And it's all a big mistake
You tell me that you love me
My heart it's going to break
You tell me that you love me
And it's all a big mistake
But I love you, you, you
And I love you
When I'm six foot underground
My heart it can be found inside of you, you, you
