This horror reins clear of the crimson sky
A devils whisper to cure the fever drawn to purify
Come are you ready moving in for the kill
Bury your idols
Dwell and grieve
The spawn of a demons will open your eyes
You can never kill this perfect cure
Clear of the crimson sky
A devils whisper to cure the fever swallowed with every
lie burn far too quickly
Fatal immense holds me
Bury your idols
Dwell and grieve the spawn of
The demon in you now hear us die
Come and gone your with me fatal demise breaks
through
Die with you idols
But still believe your demon lies in you
Crawl inside open your eyes
It's a constant evolution of a dying breed
Consumed with death put to the test
It's only a solution clear of the crimson sky
It's never the same cold blooded panic
We live in vein
