Love makes us strong
Don't close your eyes, you're not alone
When you're out of control, I will guide you down, I
won't let you fall
Feed on my energy, you'll be amazed how brave we
can be
I'll take the pain, I'll take the pain away, I'll share your
laughter
Dream your first dream with me thousands of light
years from here

Love makes us strong
Open your mind, we can do no wrong
And there are others who think life is worth fighting for
'till we win freedom
There is a sanctuary, beyond this place, this universe
So far from our time, another frequency and one
perfect reason

Dream your first dream with me thousands of light
years from here (We can go there)
There shines our promised land (We can go there),
you'll smile in wonder

There's light and there's water, pastures green and no
hunger, under another sun
And there's someone like you, it's no strangers face,
it's your reflection (We can go there)
Dream your first dream with me (We can go there)
thousands of light years from here (We can go there)
There shines our promised land (We can go there),
you'll smile in wonder (We can go there)
There shines our promised land (We can go there),
love makes us strong (We can go there)
There shines our promised land (We can go there),
you'll smile in wonder (We can go there)
There shines our promised land (We can go there),
love makes us strong (We can go there)
There shines our promised land (We can go there),
you'll smile in wonder
