

Thine Eyes Bleed

"Warning"

Visit "[Warning](#)" on MotoLyrics.com

Take a look at the red light my fever spreads
I want to make you bad and disillusionized
Feel the pain of the spotlight I am your life
Pick up your telephon believe what I say
It's a view of your whole life are you surprised?
What can I do for you? Your life is a lie
Take a look at the spotlight it's all the same
What has you done for me? That's all what I say
I've been working hard
Go my way too smart
I believe in god
I'm afraid in blood
What else can I do?
Make my heaven blue
Give me anything
I think I'm everything
It's the sound of an earthquake you feel the end
Your name flies with the wind and light is far away
What's the matter with your love you are so bored
All girls you ever had said: you must be alone
What's the matter with your love
What's the matter with your life...
Take a look at the spotlight it's all the same
What has you done for me? That's all what I say
I've been working hard
Go my way too smart
I believe in god
I'm afraid in blood
What else can I do?
Make my heaven blue
Give me anything
I think I'm everything
What's this life...
What's this life...
What's this life...
What's this life...
