Sixteen years with you  
Nothing i'd rather do  
Than see your ashes hit the ground  
Put me inside a box  
And hope i never find the lock  
We're both amazed i'm still around

Convince them all that it's their fate  
Convince them all that it's too late  
Convince them they're not special  
Isn't that just fucking great

Goodbye temecula  
I hope you burn while i'm away  
You left me dirty someplace i can't even see  
And that will never wash away

A tradition of hate  
I guess i'm just too late  
I'll watch it happen once again  
Your fortress cannot last  
One day i'll find a match  
And i'll ignite that flame again

Drain me of everything you can  
Drain me then laugh as i can't stand  
Drain me then burn in hell  
As soon as i find that gas can

Sick of this one horse town  
We'll burn it to the ground  
Children with torches march around  
And i can almost hear the sound

Goodbye temecula
