You got something that I want from you,
You got something that I want you
I'm gonna tell you what I gotta do, I'm gonna tell you
what I wanna do
And you can't hold me down

I wanna be loud, I wanna get out
You've got the noise, I've got the habit
Losing control, if I have it
I wanna be loud

When lights are black and blue, white lies, I could see
through
It's getting complicated, give me something, novice
ate it
I can only take anymore
And you can't hold me down, no you won't hold me
down

I wanna be loud, I wanna get out
You've got the noise, I've got the habit
Losing control, if I have it
I wanna be loud

You got something that I want from you, you got
something that I want you
Nobody's gonna turn me down when I'm shouting out
You got something that I want from you, you got
something that I want you
Nobody's gonna turn me down when I'm shouting out

Yeah, oh yeah

I wanna be loud, I wanna get out
You've got the noise, I've got the habit
Losing control, if I have it
I wanna be loud
