(Verse)

I, in the battle of my life
Try to feel the world through broken eyes
Ever since you came

I will never be the same, I will never be the same
You were the colours and the lights
Fire red and burning bright
Ever since that flame
I will never be the same, I will never be the same

(Chorus)

Got me sideways, girl
You're the sun in the rain, you're the pleasure in the
pain
Sideways, girl
Got me careless in love and I can't get enough
All day, every day
We can leave, run away
All day, every day
Got me sideways, girl
I can't get enough
I can't get enough

(Verse)

I keep you close, so close and I
Want to take up all our time
Keep it locked away
Now everything has changed, now everything has
changed
And you, you're the one in a million girl
Want to be a part of your perfect world
Want to rearrange
Now everything has changed, now everything has
changed

(Chorus)

Got me sideways, girl
You're the sun in the rain, you're the pleasure in the
pain
Sideways, girl

Got me careless in love and I can't get enough
All day, every day
We can leave, run away
All day, every day
Got me sideways, girl
I can't get enough
I can't get enough

I can't get enough

(Chorus)

Got me sideways, girl
You're the sun in the rain, you're the pleasure in the
pain
Sideways, girl
Got me careless in love and I can't get enough
All day, every day
We can leave, run away
All day, every day
Got me sideways, girl
I can't get enough
I can't get enough

All day, every day
We can leave, run away
All day, every day
All day, every day
We can leave, run away
All day, every day
