I think I like you  
I don't even know you  
But something is telling me that  
I think I need you  
You're like my thoughts come true  
And I can't argue with that.

You might think we're different from each other,  
But we both rock the same heart.  
We could be the best if we're together  
And I'm telling you, I'm gonna make you mine:  
You're exactly what I need.

It's love, love, love:  
And what could be better?  
You're the sun in perfect weather  
And you look so good on me, yeah.  
Cause it's love, love, love, love, lo-oooove.  
You could say we're different from each other  
But we're falling in love.

I wanna hold you, curl up and unfold you.  
I don't care what anyone says, no.  
Cause there's nothing like you,  
No one that comes close to giving me what you have.

You might think we're different from each other,  
But we both rock the same heart.  
We could be a match made up in heaven  
If you let me in,  
So I can make you mine.  
You're the perfect melody.

Love, love, love:  
What could be better?  
You're the sun in perfect weather  
And you look so good on me, yeah.  
Cause it's love, love, love, love, lo-oooove. (love, love,  
love, love)  
You might think we're different from each other  
But we're falling in love.

(Yeah, we're falling! I'ma dance in my underwear!  
Yeah, we're falling! Yeah, we're falling in love!)

Love, love, love, love  
Love, love, love, love

We're falling in love,

Yeah, it's love, love, love:  
What could be better?  
You're the sun in perfect weather  
And you look so good on me, yeah.  
(You could say we're different from each other but  
we're falling in love)  
Cause it's love, love, love, love, lo-ooooove. (love, love,  
love, love)  
You could say we're different from each other  
But we're falling in love.

You could say we're different from each other,  
But we're falling in. Love.
