

This Ending

"Goodnight California"

Visit "[Goodnight California](#)" on MotoLyrics.com

Stay awake
We've got a few more hours baby
And this mistake could be the last of us
But maybe...
Pass me one more cigarette
And we'll exhale a road

If we leave right now, we could go all night
Drive til there's nothing left of us
Leave it all behind
And when we get there
We could talk about it
Try and sort it out
Staying up all night
Just to get it out
And we could say goodnight California

Leave the map
We'll go wherever this road takes us
If we look back we could see something more
But maybe...
Change the radio station
This static's got me down

If we leave right now, we could go all night
Drive til there's nothing left of us
Leave it all behind
And when we get there
We could talk about it
Try and sort it out
Staying up all night
Just to get it out
And we could say goodnight

Maybe in the California sun we could see it all
The reasons why we can't ever seem to be the way we
wanna be at all

Wide awake we could say all the things we wanted to
say
And change our minds baby

We've got the time to change our minds

If we leave right now, we could go all night
Drive til there's nothing left of us
Leave it all behind
And when we get there
We could talk about it
Try and sort it out
Staying up all night
Just to get it out
And we could say goodnight,

If we leave right now, we could go all night
Drive til there's nothing left of us
Leave it all behind
And when we get there
We could talk about it
Try and sort it out
Staying up all night
Just to get it out
And we could say goodnight California

We could say goodnight California
California
We could say goodnight California
