Alone I spend another night  
Surrounded by the shadows  
Watching the falling dense snow  
I try to understand this world

Feeling the cold and solitude,  
Sailing the seas of thoughts,  
I plunge in the darkest depths  
Of my subconscious abyss.

One day humanity will know  
Every man always walks alone  
He's the source of wisdom and force.  
He has created and killed the god...

It's high time to wake up  
Forget the false morality.  
Face the dawn of man's rebirth  
And philosophize with hammer!

I am the lord of the universe  
I am the one who kills the Gods  
I am the one whose throne is high  
I am the wisdom they'll never find
