Blessed by the gods of war  
We enter the age of fire  
We' re barbarian and raw  
We will harvest your souls....

Await us soon in your place  
We will ruin your peace.  
Weak ones! It' s too late...  
Now you will know your fate...

All we need is war...  
War to clean up this world....

Not every form of life  
Deserves natural death  
We' re here to help them die  
We purify the earth.

So now we set a fire  
And soon explosion will come  
Rivers of blood will flow  
The ancient order will be reborn!
