Welcome to the earth son
It's disfigured from it's past
Raped from our neglect and
Diseased from the fucking holocaust

Demise

Toxins in the air are killing all of natures gifts
Poison thy holy goddess
Begin her slaughter
Manufacture so that we exist

Demise

Polluted waters no longer giving life
Rape our mother to satisfy our greed
Feed us nectar from the guardian of lies
Alone we witness, witness her demise

Dead now the fires burning
From the wars of forgotten past
The earth I give to you now
And the pain of living out as humanities last
