Visit "[Solitude](#)" on MotoLyrics.com

Viral infection cleansing our sins
Nature's redemption concealed within
Justice for our race we are so blind
Extinction the price we are to die

Suffering witness my infection
Holocaust deep within my own mind
Mass appeal witness it's conception
Earth's decay solitude of life
We die

Solitude of life

Seething sores the spores will provide
Puss leaks from wombs caused by the lies
Mother nature's rage will not die
Lacerations will open our minds

Suffering witness my infection
Holocaust deep within my own mind
Mass appeal witness it's conception
Earth's decay solitude of life
We die

Solitude of life

Viral infection rotting my skin
Insides rejecting bleeding begins

Suffering witness my infection
Holocaust deep within my own mind
Mass appeal witness it's conception
Earth's decay solitude of life
We die

Solitude of life

We die
