Days go by, nothing stays the same  
As you and I move on, move on  
Tonight is tomorrow's memory  
Who knows where we both may be by dawn  
Time goes on and on and on and (repeats)

Time waits for no one

Don't let it pass us by  
Time waits for no one  
It goes on and on  
And show me that you're real  
Touch me now, baby, keep my kiss

Can't say whether we will ever be, you and me  
We just have this time together  
Time goes on and on and on and (repeats)

Seize the moment, here between us  
Time goes on and on and on and (repeats) Only stars  
above can see us now
